

Deploy the right type of cloud to accelerate innovation

Private

When to use

Organization has requirement to utilize on-premises infrastructure (security policy, investment equity, limited WAN bandwidth, etc)

30-40 IBM Cloud services

Dedicated

When to use

Organization has isolation requirement for security and/or performance reasons

Organization seeks the security and compliance benefits of public cloud

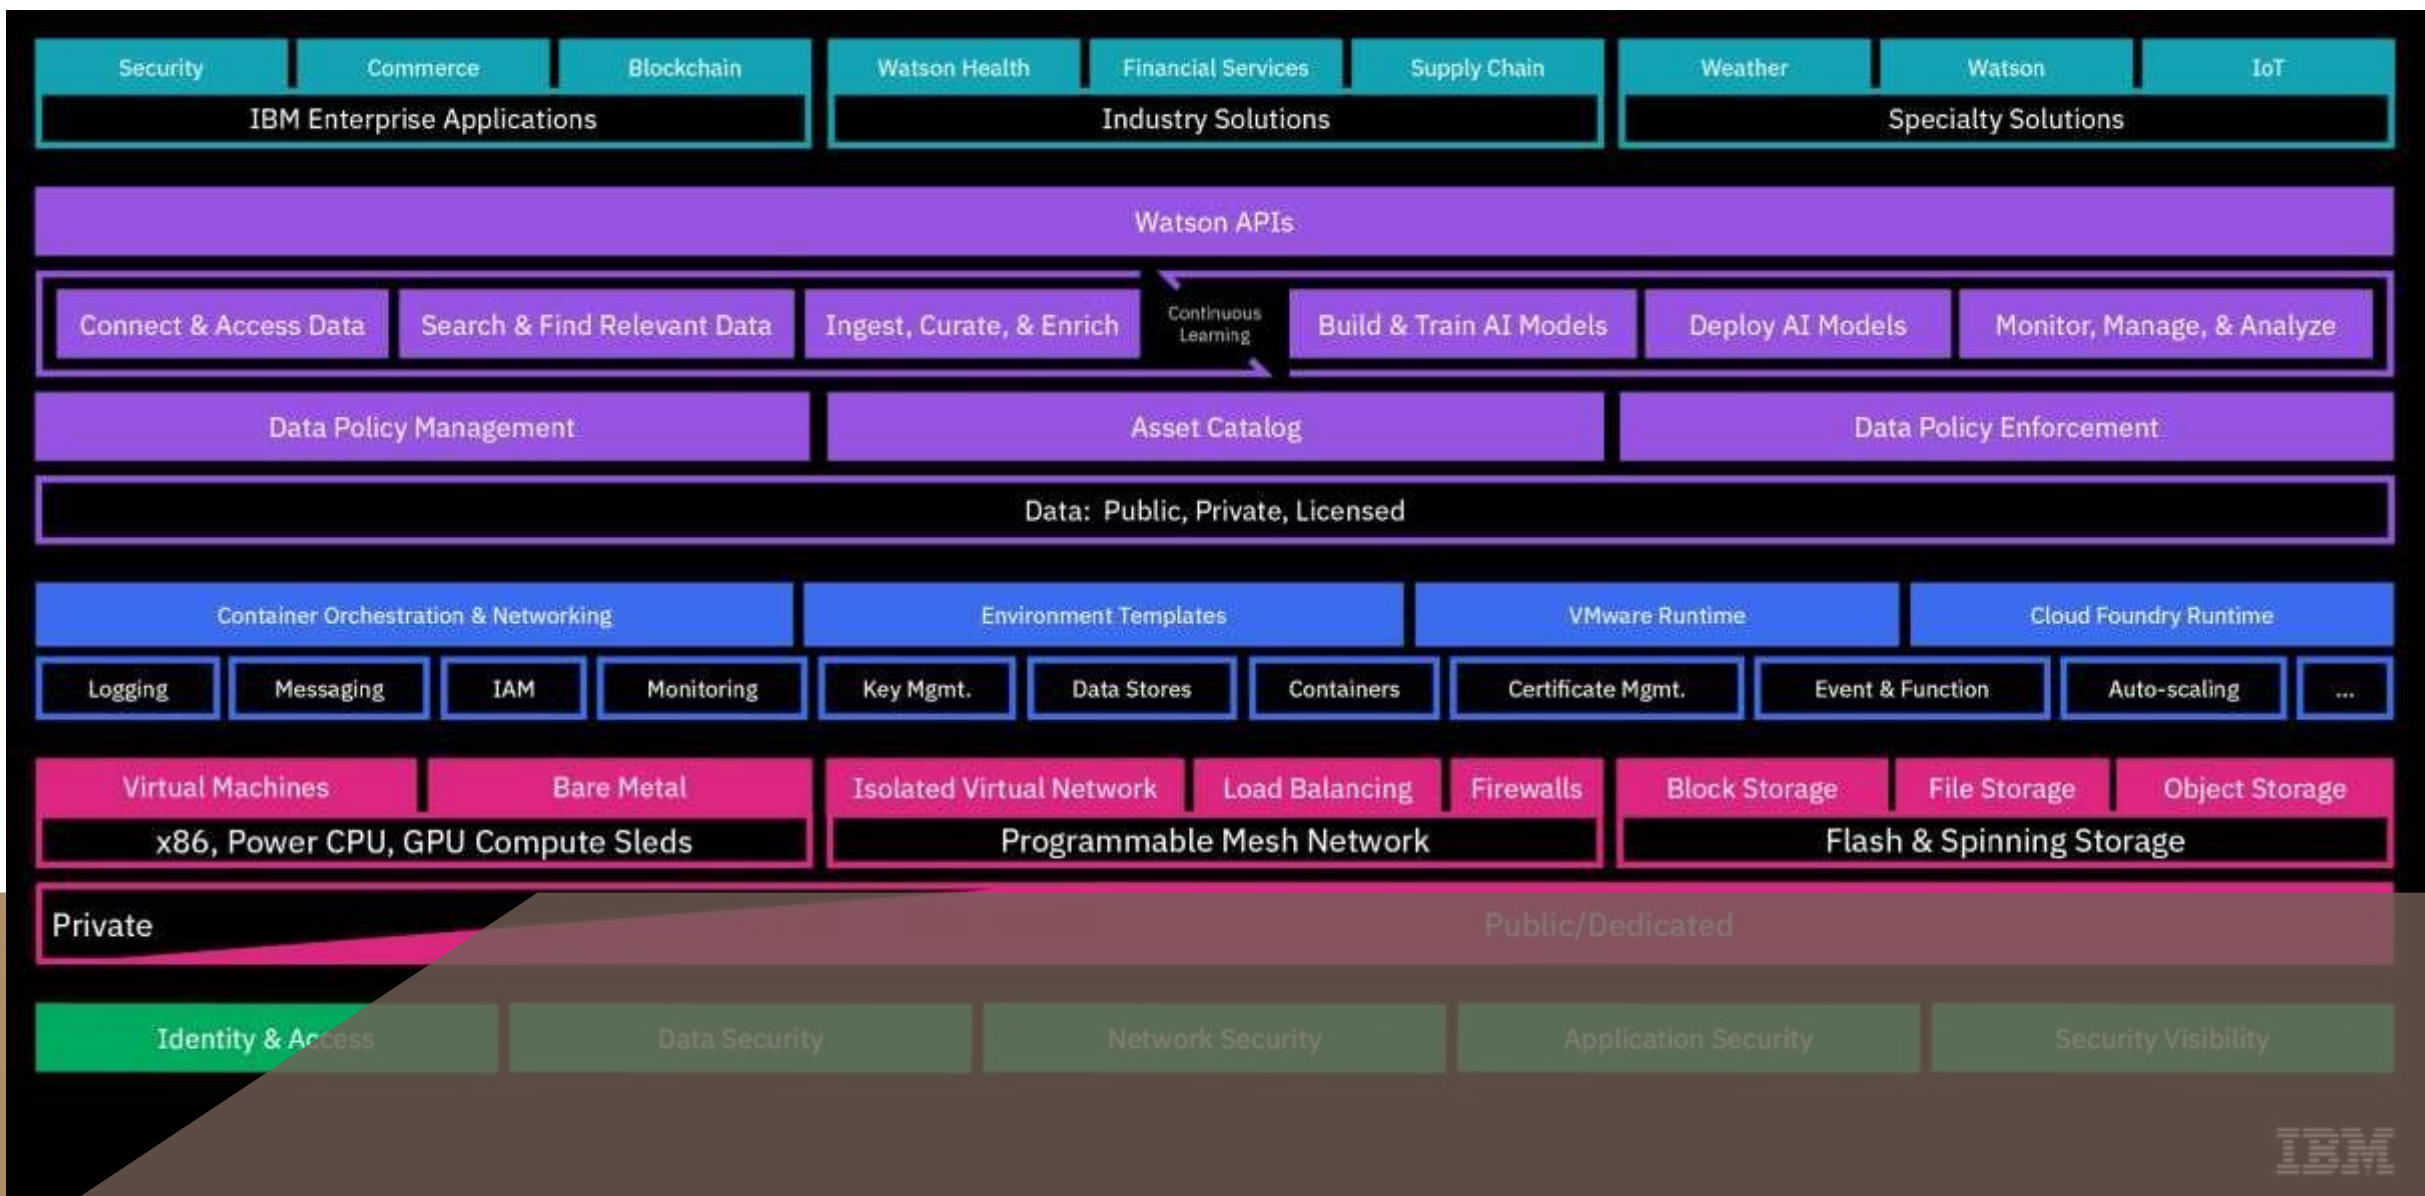

100+ IBM Cloud services

Public

When to use

Organization embraces encrypted multi-tenant data and shared processing models

IBM is the Cloud for Business

Innovate with the latest technologies from any cloud.

AI READY

Create innovative, cloud-native apps using AI, IoT, blockchain, high performance computing and other disruptive technologies

BUILT FOR ALL YOUR APPLICATIONS

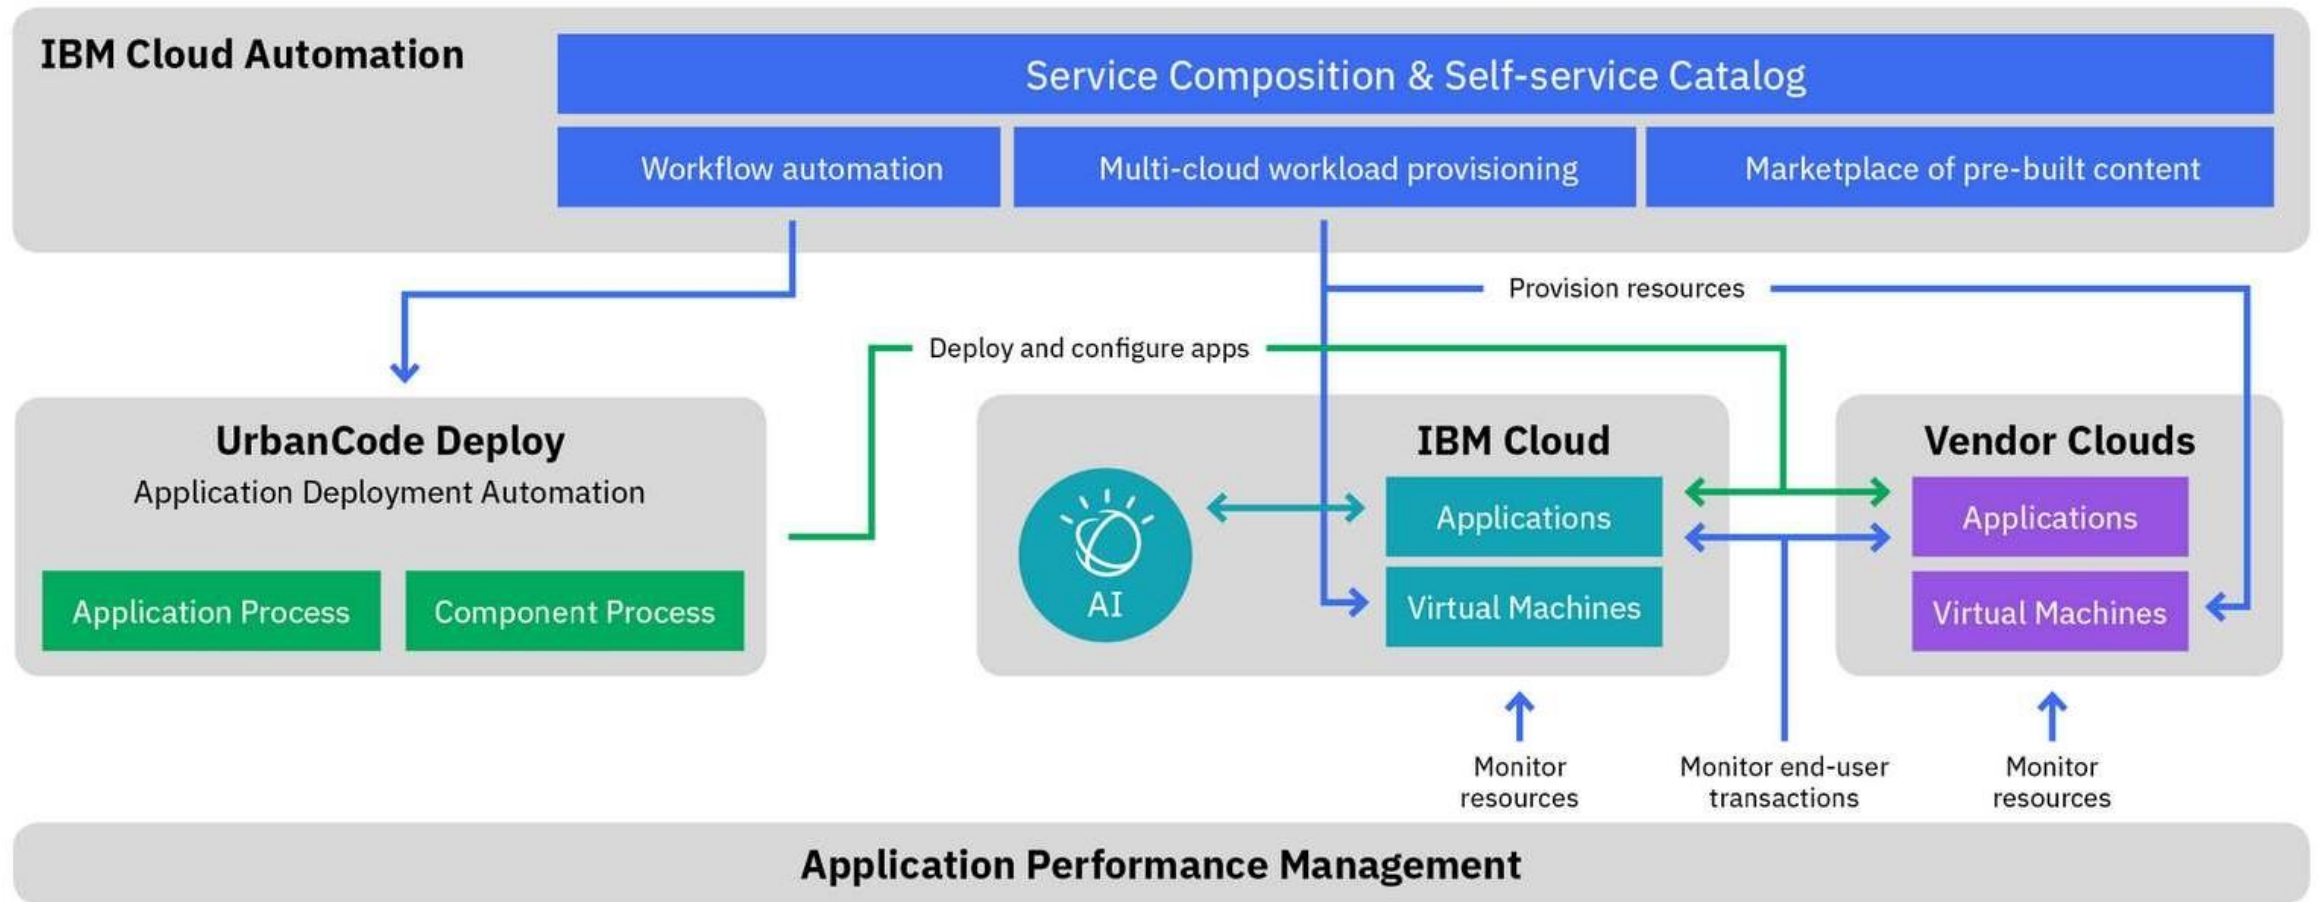

Exploit unmatched choice and industry expertise

SECURE TO THE CORE

Deploy it where you need to on a secure network, without sacrificing quality and compliance

IBM provides tools to help clients manage multi-cloud environments

By 2020, more than 90% of enterprises will use multiple cloud services and platforms¹

serverless apps

IBM CLOUD PRIVATE BRINGS CLOUD NATIVE TO THE ENTERPRISE

- Open Kubernetes-based container platform
- Cloud Foundry for app dev and deployment
- DevOps toolchain integration

Hybrid Integration

- Integration capabilities to unlock and connect
- Secure access to public cloud services (AI, Blockchain)
- Consistent experience across private/public

Investment Leverage

- Containerized versions of IBM Middleware
- Prescriptive guidance to optimize workloads
- Work with existing apps, data, skills, infrastructure

Management & Compliance

- Core operational services including logging, monitoring, security
- Flexibility to integrate with existing tools and processes

IBM is the
Cloud for
Business.

Yours.
